For Immediate Release

Optimax brings on summer interns

Optimax anticipates great success on the projects assigned to our summer interns and looks forward to the shared learning experience. The interns, composed of local high school and college students, will learn about the advanced manufacturing work environment, and with the right skills and aptitude, will be considered for potential full-time employment.

Optimax recognizes the importance of new ideas and learning about the up-and-coming resources available in the market. Students learning about the latest technology provide a fresh outlook and have a unique opportunity to create value and make a lasting difference.

This year, Optimax has interns filling the following roles:

- Process Auditing
- Infrastructure
- Sales and marketing
- Research and Development
- Manufacturing Engineering
- Continuous Improvement

Optimax continues to look for skilled workers to fill the pipeline and each intern is seen as a potential full-time employee to help keep Optimax on the cutting edge of technology. If a full-time job offer is proposed and accepted, the student has the opportunity to work full-time and finish school part time with 100% tuition reimbursement. For more information about Optimax's internship program, please contact jobs@optimaxsi.com.

About Optimax: Optimax is an EEO manufacturing company that provides rapid prototyping of precision optical components in sizes up to 300mm. Optimax specializes in Asphere, Cylinder, Sphere, and Plano/Flat optics. All parts are manufactured to customer-supplied specifications. Final inspection data is included with the optics.
